

HOW TO BUY THE RIGHT SIZE

It is necessary when buying and using your outdoor rugs to bear the following points in mind.

Fit is all important. Rugs are usually sized in three inch increments. The measurement refers to the distance from the centre of the chest of the horse around the body of the horse to the rear of the quarters where you expect the rug to finish. As horses of any given size vary so much in girth and build, it is essential to take these measurements before purchasing your rug. Do though check the sizing and fitting instructions when buying a new brand of rug – as with your own clothing, various brands may fit differently.
